

Company Profile

Poel Bosbouwartikelen BV, predominantly focussing on Forestry, has developed from a Stihl dealer into a major supplier for the landscape industry with a broad range of products that are worldwide represented by International Tree Service BV.

The current portfolio consists of:

- | | |
|-----------------------|--|
| - Tree care products | Wound dressing, evaporation blockers, organic insecticide |
| - Root ventilation | Systems to improve ventilation and irrigation to tree roots |
| - Fertilizers | Organic material to improve soil activity |
| - Tree Research | Equipment to perform safety research on trees |
| - Root Barriers | To prevent tree roots from damaging foundations of buildings, roads or causing fractured drainpipes. This also prevents the spread of unwanted vegetation such as Japanese knotweed. |
| - Cable bracing | To safe tree branches without destroying the shape of the tree |
| - Root system bracing | Stabilisation of new planted trees |

Representatives:

International Tree Service is represented by a number of resellers to reach global coverage. For more information on our portfolio, please contact one of our resellers as listed below. Are you interested in the ITS portfolio, but didn't find your country listed, please contact Mr. Gerard Bodewes directly at ITS@Poelbosbouw.nl.
